

HIGH COST OF DRUGS

BECAUSE OF WAR

Quinine Has Gone From Forty-two Cents to One Dollar and Ninety Cents—Too Costly to Be Sick.

If any one insists upon being sick at the present time, and this illness necessitates the purchase of any of the drugs, medicines or preparations mentioned here—well, read:

Much has been said about the rapid advance and great increase in the price of aspirine, quinine, and while these two preparations have gone up, especially quinine, there are many others that have advanced just as much or more. Aspirine one year ago was 42 cents per ounce, and now it is 85 cents; quinine was 42 cents, and now it is \$1.90 an ounce.

Both bromide of potash and bromide of soda, which one year ago sold for 4 cents a pound, are now selling for \$5 per pound.

Epsom salts, which sold for 1 1-2 cents a pound, is now bringing 5 cents.

Peroxide of hydrogen, which is universally used, has doubled in price

within the past year.

Glycerine was 40 cents, and now it is twice that much.

Beachwood creosote has jumped from 75 cents a pound to \$9 a pound. This preparation is being used for making explosives of certain kinds in the war countries.

Sanitoline has doubled in price.

Benzonate of soda, which, before the war started, was 35 cents per pound, is now selling for \$5 a pound.

Carbolic acid, bringing 25 cents a year ago, is now sold for \$2.25 per pound.

Calomel has jumped from 90 cents to \$2.25 per pound.

Phenolax wafers are bringing twice what they did before the war.

Salol, a preparation on the same order as aspirine and used for rheumatism and pain, is now hardly quoted, it is so scarce. It was \$1.25 per pound, and if any could be bought now it would bring ten times that amount.

Cocoa quinine, all quinine preparations, including iron, quinine and strychnine, have all been advanced greatly.

Aspirine is supposed to be made in

Germany, that is where the original and genuine comes from; but even before the war started, it was a well known fact to all druggists that large quantities of aspirine was manufactured not only in Canada but also in this country. So this fact doubtless accounts for the price not being higher than it is.

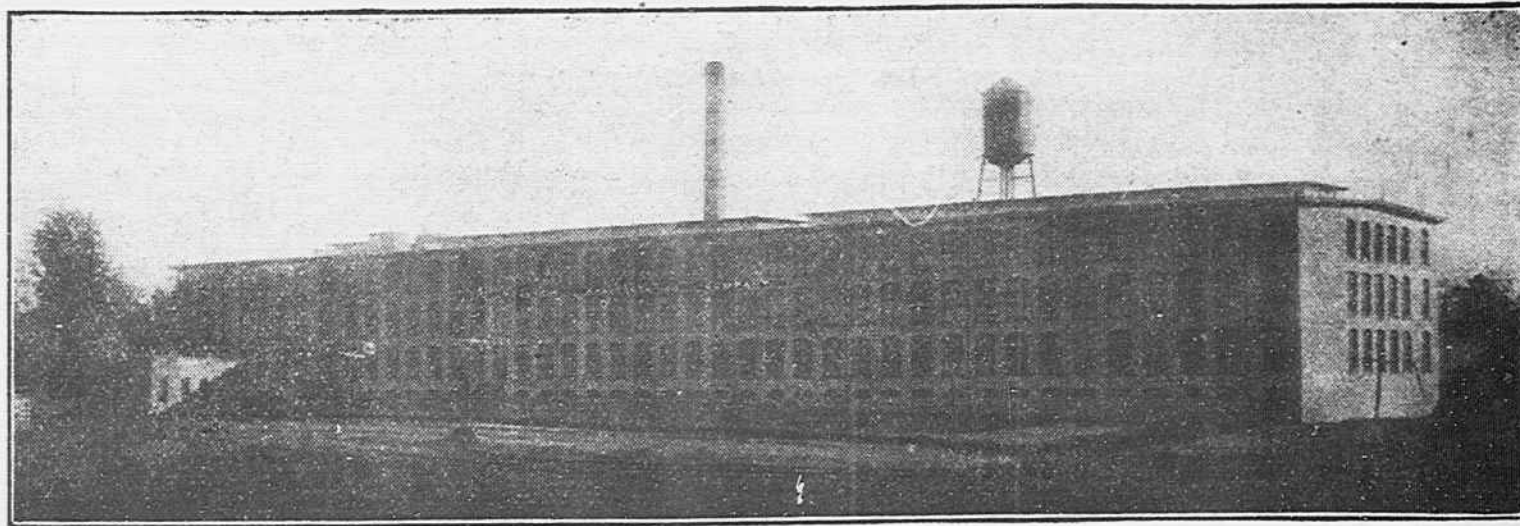

Phenacetine, acetanilide and veronal have not been advanced to any extent, but the price of all of them is likely to go up at any time.

Alcohol is about the same price.

WILBUR BROS. DAIRY.

A Successful Business Enterprise Supplying a Very Important Demand of the Community.

Wilbur Brothers, two enterprising young men, originally from Charleston, have established in Newberry a modern, sanitary dairy, and have made a gratifying success of the business of supplying milk to the city. In community life there is no more important affair than the milk supply. When well managed and kept sanitary it is the source of the food supply of the infant and the sick person, and few households can get along without the convenience of the modern dairy. When it is not so carefully managed it is often the source of infection that spreads disease instead of curing it.

MOLLOY MANUFACTURING COMPANY.

In the Wilbur Dairy, the Messrs. Wilbur have spared no pains or expense to have everything just as it should be. They are bright, intelligent and well educated young men, and they have made a careful study of dairying and sanitation, and they apply their knowledge and experience in their enterprise for the benefit of the people of Newberry. They have a charming place near the city, where they raise an abundance of food crops, hay and grain for their stock, and food stuff for market. Their fields are fenced so that their cattle can get the greatest benefit from pasturage. They have splendid barns and silos for

winter feed and models in the way of milking barns, where the cows are kept as clean and free from flies and dust as can possibly be arranged, and the milk is carried to the bottling room without being handled in the open, and it is there aerated and bottled by machinery that is kept as clean as a pin. They have several delivery routes in the city which are supplied by specially constructed, neat wagons, and their customers have considerably increased as the public has learned how carefully they handle their milk and the excellency of the quality of the milk.

T. R. is almost as silent as the Bull Moose party he founded.—Detroit Free Press.

Col. Watterson is laying for the pacifists. That is why they call him Mars Hen.—Columbia State.

The British are awakening to their needs, says a London cable. What, so soon?—Portland Oregonian.

The Germans in Russia are to wear white uniforms this winter to make them invisible. Isn't war getting beautiful?—Baltimore American.
